Caltrans Approved 24 Hour Water Pollution Control On Construction Sites:

Designed for SWPPP Preparers and Water Pollution Control Managers (WPCMs)

Covers Newest CALTRANS Template, Forms and CA GCP Requirements.

This course was developed and is taught by experienced professionals currently working in the field for Caltrans, City, County and local Agencies on water quality issues. Lecture and instruction is backed by hands on BMP experience that is proven and effective in the field. Students are encouraged to ask questions and discuss current, past or future projects related to storm water compliance. Visit our website for a detailed description.

**Three (3) day
training:
\$500.00
Lunch Included**

Attention! Caltrans Specs have changed

A Water Pollution Control Manager must be assigned to implement the SWPPP. The WPC Manager must comply with the Permit (Order No. 2009-0009-DWQ, NPDES No. CAS000002) qualifications for a QSP and QSD. The QSD must have the following qualifications:

1. Department approved storm water management training described in the Department's "Construction Storm Water and Water Pollution Control" web site
2. Registration or certification described in the Permit

This means you must have both the Caltrans 24 hour training and meet the requirements for a QSD.

QSP/QSD General Construction Permit Training

California has adopted a new General Permit for Stormwater discharges associated with Construction and Land Disturbance Activities (Order No. 2009-0009- DWQ, NPDES No CAS000002). Effective July 1, 2010 this permit will affect how your projects are designed, implemented, maintained, monitored, and reported. Join us for a clear, concise and informative session on the significant changes brought about by the new permit. This course is taught by experienced professionals who are currently working in the field for Caltrans, City, County and local Agencies on NPDES, SWPPP and water quality issues.

QSP TRAINING AS REQUIRED BY THE 2009 GENERAL CONSTRUCTION PERMIT

COURSE DESCRIPTION

16 Hour Course

Cost \$500.00

California's construction stormwater general permit (GCP) requires that practitioners who implement SWPPPs demonstrate appropriate qualifications for this work. The CGP identifies a set of prerequisite qualifications that would demonstrate the skills, knowledge and experience necessary to implement SWPPPs. In addition, the CGP requires that individuals in these positions complete a State Water Resources Control Board (SWRCB) approved or sponsored training course within two years of the CGP adoption (September 2, 2011).

This course curriculum will provide an in-depth review of the information individuals planning to become construction QSPs (prerequisite to the QSD) will be expected to know. It will provide an in-depth review of information concerning the CGP. This course consists of 5 modules: Training Overview and Regulations, Erosion Processes and Sediment Control, SWPPP Implementation, Monitoring, and Reporting.

QSD TRAINING AS REQUIRED BY THE 2009 GENERAL CONSTRUCTION PERMIT

COURSE DESCRIPTION

8 Hour Course

Cost \$250.00

California's construction stormwater general permit (GCP) requires that developers of construction Stormwater Pollution Prevention Plans (SWPPPs) (known as Qualified Storm Water Developers or QSDs) and practitioners that implement SWPPPs demonstrate appropriate qualifications for this work. The CGP identifies a set of prerequisite qualifications that would demonstrate the skills, knowledge and experience necessary to prepare and/or implement SWPPPs. In addition, the CGP requires that individuals in these positions complete a State Water Resources Control Board (SWRCB) approved or sponsored training course within two years of the CGP adoption (September 2, 2011).

This course curriculum will provide an in-depth review of the information individuals planning to become construction QSDs will be expected to know and information concerning the CGP. This course consists of 3 modules: Project Planning and Site Assessment, SWPPP Development and Permit Registration Documents (PRDs) and Project Closeout.

Note - Prerequisite is the completion of the QSP Training.
